

BRANDON TSUEDA

Network Engineer | Cybersecurity Professional | Business Intelligence

Louisville, KY | (502) 676-8984 | brandon.tsueda@live.com | [linkedin.com/in/brandontsueda](https://www.linkedin.com/in/brandontsueda) | brandontsueda.com | github.com/BrandonTsueda

PROFESSIONAL SUMMARY

Network Operations Engineer with hands-on enterprise experience monitoring infrastructure, triaging alerts, supporting incident response workflows, and maintaining service availability in a 24/7 NOC environment. Holds a Master of Science in Business Intelligence, Bachelor of Science in Cybersecurity, and Associate of Science in Information Technology. Strong foundation across networking, security, Linux/Windows systems, automation, dashboards, and self-hosted infrastructure.

CORE SKILLS

Network Operations	DNS, DHCP, TCP/IP, VPNs, SSL/TLS, IPsec, SolarWinds, Dynatrace, ServiceNow, alert triage
Security Tools	Nessus, Nmap, Wireshark, Metasploit, Burp Suite, OpenSSL, CyberChef, OWASP
Frameworks	NIST 800-53, NIST CSF, CMMC, PCI DSS, HIPAA, GDPR, MITRE ATTACK framework
Systems	Linux, Windows Server, Windows 10/11, macOS, Azure, VMware, ESXi, KVM, Proxmox, Docker
Automation	Python, PowerShell, Bash, Ansible, GitHub, API workflows
Analytics	Power BI, Advanced Excel, KPI reporting, dashboards, trend analysis, dimensional modeling

PROFESSIONAL EXPERIENCE

Network Operations Center Engineer | Humana | Louisville, KY | April 2024 - April 2026

- Monitor enterprise network activity, server health, and application signals across large-scale environments supporting 50,000+ servers.
- Investigate alerts and outage tickets using SolarWinds, Dynatrace, ServiceNow, and related operational tools.
- Support DNS and firewall change workflows while maintaining clear documentation, escalation context, and service-impact awareness.
- Apply structured troubleshooting across connectivity, routing, firewall, storage, services, containers/VMs, and application layers.

Global Inside Partner Development Manager | Microsoft | Remote | Jan 2022 - Dec 2023

- Supported global partner alliances with SAP, Bentley, and ESRI across cloud, SaaS, and platform solution motions.
- Managed SaaS/PaaS pipeline reporting exceeding \$700M annually and produced reporting for executive stakeholders.
- Strengthened ability to connect technical solution value with customer needs, business outcomes, and stakeholder communication.

SELECTED PROJECTS

Bratsu SecureOps Platform

- Built a full-stack managed IT and cybersecurity platform concept with authentication, RBAC, endpoint heartbeat monitoring, ticketing, and reporting.
- Implemented containerized deployment patterns using Next.js, TypeScript, Docker, Linux, and reverse proxy workflows.

Proxmox Homelab Infrastructure

- Maintain a Proxmox-based environment with VMs, LXCs, Pi-hole DNS, Tailscale, Nginx reverse proxying, monitoring, backups, and self-hosted AI tooling.
- Use the lab to practice secure configuration, incident-style troubleshooting, service recovery, automation, and infrastructure documentation.

Business Intelligence and Analytics Work

- Created academic and portfolio work involving Power BI dashboards, process analysis, data mining, ETL concepts, and operational decision support.

EDUCATION

Master of Science in Business Intelligence | Full Sail University
Bachelor of Science in Cybersecurity | Full Sail University
Associate of Science in Information Technology | Full Sail University

TARGET ROLES

Network Engineer, NOC Engineer, Systems Administrator, Cybersecurity Analyst, Security Operations Analyst, Infrastructure Support Engineer, Business Intelligence Analyst
